## SECTION 3 - TERMS OF REFERENCE

### 3.1 Background

Good sanitation and hygiene practices are a critical determinant of health. As the first principle of health care is —to do no harm, it is essential to have our health care facilities demonstrate high levels of cleanliness, hygiene practices.

—WHO data on the burden of disease shows that —approximately 3.1% of deaths and 3.7 % of disability-adjusted-life-years (DALYs) worldwide are attributable to unsafe water, sanitation and hygiene. The Centers for Disease Control and Prevention (CDC) reports that approximately 1 in 20 patients acquired an infection during a stay in a healthcare setting where they are receiving medical or surgical treatment. Further, the perception of patients and the public regarding the level of cleanliness and ambience of a facility directly affects the level of confidence they have in the health care offered in a facility. There is no more visible parameter about Quality than cleanliness in public health facilities.

Against this backdrop, plan has been chalked out for strengthening Housekeeping & Cleanliness services across hospitals of the State. List of the bed strength along with the requirement of housekeeping and cleaning personnel for different category of Institutions is mentioned at Section
